

The **ZOO** – *Where We Meet Wild Animals*

The zoo is home to many animals. It is a great place to spend a hot summer day.

When we visit the animals, we should treat them with courtesy. We should not make loud noises because that may scare them. And for our own safety, we should not climb fences, feed animals, or pick plants.

While at the zoo, we can watch how different animals live and play. Sometimes, we may have a chance to see them do things that we do not think they can do. We can even draw a picture of the animal that we like best and give it a name.

The zoo is a fun place to go.
