

Niagara Falls

Niagara Falls in Ontario is one of the world's natural wonders. Every minute, as much as six million cubic feet of water flow over the falls during high flow season.

Niagara Falls is a truly amazing sight. When you walk through the tunnel to reach its bottom and stand behind it, you can feel the power of the thunderous, roaring water plunging down from above.

Another way to take in the spectacular view of the Falls is to go on a boat ride. For safety reasons, the boat cannot get too close to the Falls, but you can still feel its power as the mist created by the splash and the rain-like water droplets make it hard for you to keep your eyes open. You may find yourself soaking wet even with a raincoat!

Even if you do not have a chance to visit the Falls this summer, try learning more about this natural wonder of the world on the Internet.
