

DAY AND NIGHT

Weight of the dry towel: _____

A

from 9:00 a.m. to 6:00 p.m. (9 hours)

After being hung in the sun for 9 hours,
its weight was _____ .

B

from 10:00 p.m. to 7:00 a.m. (9 hours)

After being hung outside overnight for
9 hours, its weight was _____ .

Towel **A / B** was lighter because **more / less** water evaporated from the towel in the day when the temperature was higher and the humidity was **higher / lower** .
